

Traffic Box Art Design Template: 8th and Francis St

This is a flat template of a typical traffic box showing the front, back and sides; *it is not to scale*. To get a sense for the actual project, visit the box at 8th and Francis. Official signage on the box cannot be painted over or obscured otherwise. You must use this template to show your basic design concept. Because the selection committee will review design concepts in their decision making process, you should show the colors that you would use. It is understood that the design may need to be updated or reworked once selected.

	<p>< Top (15" deep x 20 wide" – not to scale)</p>		
Front 20" W x 29.5" H	Side 14.75" W	Back 20" wide	Side 14.75" wide
